DevFest Riga

EXPECTED ATTENDEES

~500 </>

DevFest Riga: the world's largest community-driven tech conference.

The event is planned for **February 2027**, designed around practical learning, emerging technologies, meaningful conversations and hands-on collaboration.

The audience is expected to include developers, engineering students, technology professionals, founders, and curious builders. DevFest is designed as a place where ideas move from conversations into prototypes, skills and connections.

FEBRUARY 2027 · DATE TBC · RIGA, LATVIA

WHO ARE WE?

NOT GOOGLE EMPLOYEES

Google Developer Group Riga (GDG Riga) and Google Developer Groups on Campus at Riga Technical University (GDG on Campus RTU) are part of the global Google Developer Groups community, bringing together people who are passionate about **technology**, **innovation**, and **continuous learning**.

Google Developer Group
Riga

A community for developers, tech professionals, founders and curious builders **across Latvia**.

Google Developer Group on Campus
Riga Technical University

A **student-led** gateway to practical tech, industry connections and learning by doing.

Our events are **free to attend**, and everything we do — from inviting international experts to organizing hands-on workshops and conferences — is made possible through **volunteer efforts** and the **support of organizations** that share our vision.

OUR PREVIOUS EVENTS.

Community building is already happening.

We brought together around 250 participants thanks to the support of RTU Innovation and their conference hall "The Moon".

Now we are taking the next step, scaling up, and preparing for a major conference in a new venue.

15 JUNE 2026 / FUTURE TECH CONFERENCE

02 NOV 2026 / CODING WITH AI: BUILDING AGENTS

Don’t just sponsor DevFest.

Be the place where the next ideas begin.

Showcase your facilities to ~500 tech-minded participants

A potential community of future employees, customers, tenants, collaborators and brand advocates.
People experience your space in person, rather than only seeing an advertisement.

Connect your brand to education, innovation and the local economy

The tools built by our developers support e-commerce, logistics, finance, customer experiences and the systems that help businesses deliver real value — right down to getting essential goods and food onto people’s tables.

Before DevFest.

Make the connection before attendees arrive.

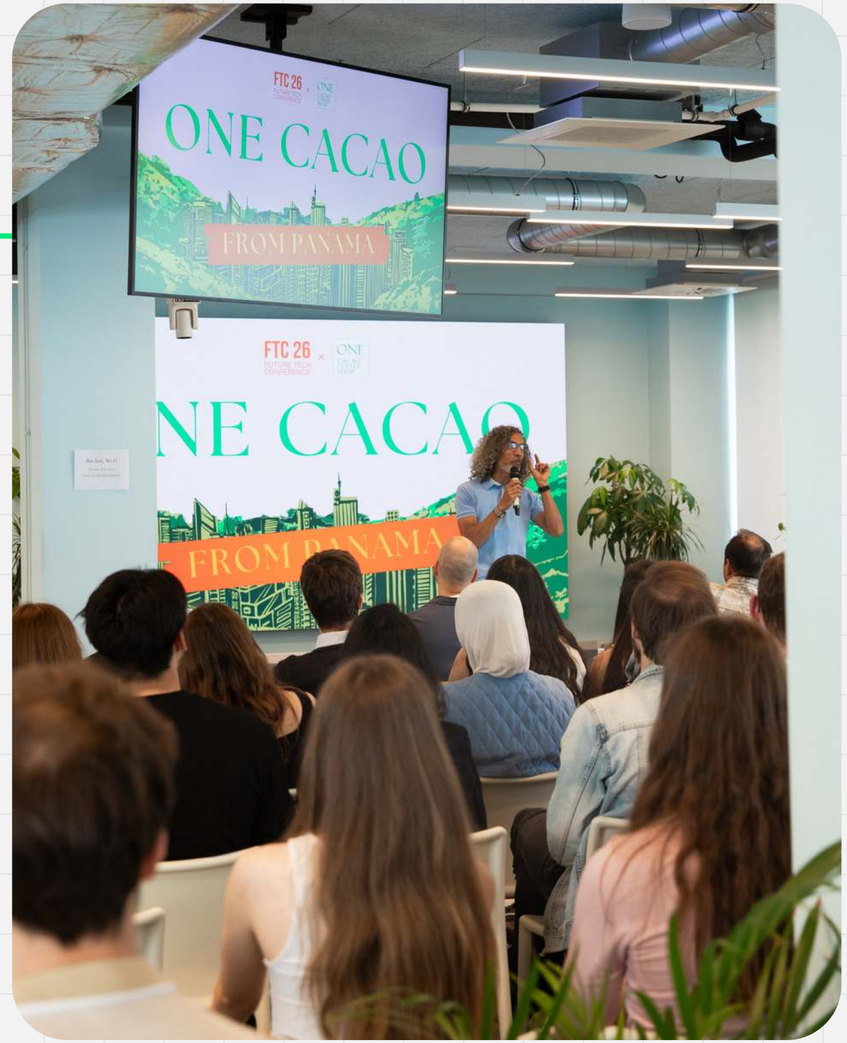

- Prominent **“Official Venue Partner” recognition** on GDG Riga and GDGoC RTU-owned event communications and relevant event pages, including a **linked logo**.
- **Dedicated venue-partner announcement** on GDG Riga social channels, with your organization tagged.
- **Venue name and location featured** in event information and registration communications.
- A planned series of **Instagram Stories and LinkedIn mentions** showcasing your space and acknowledging your role.
- Option for a **co-created “Meet the Venue” post or short video** introducing the location and its connection to innovation.

During DevFest.

Let people experience your brand in person.

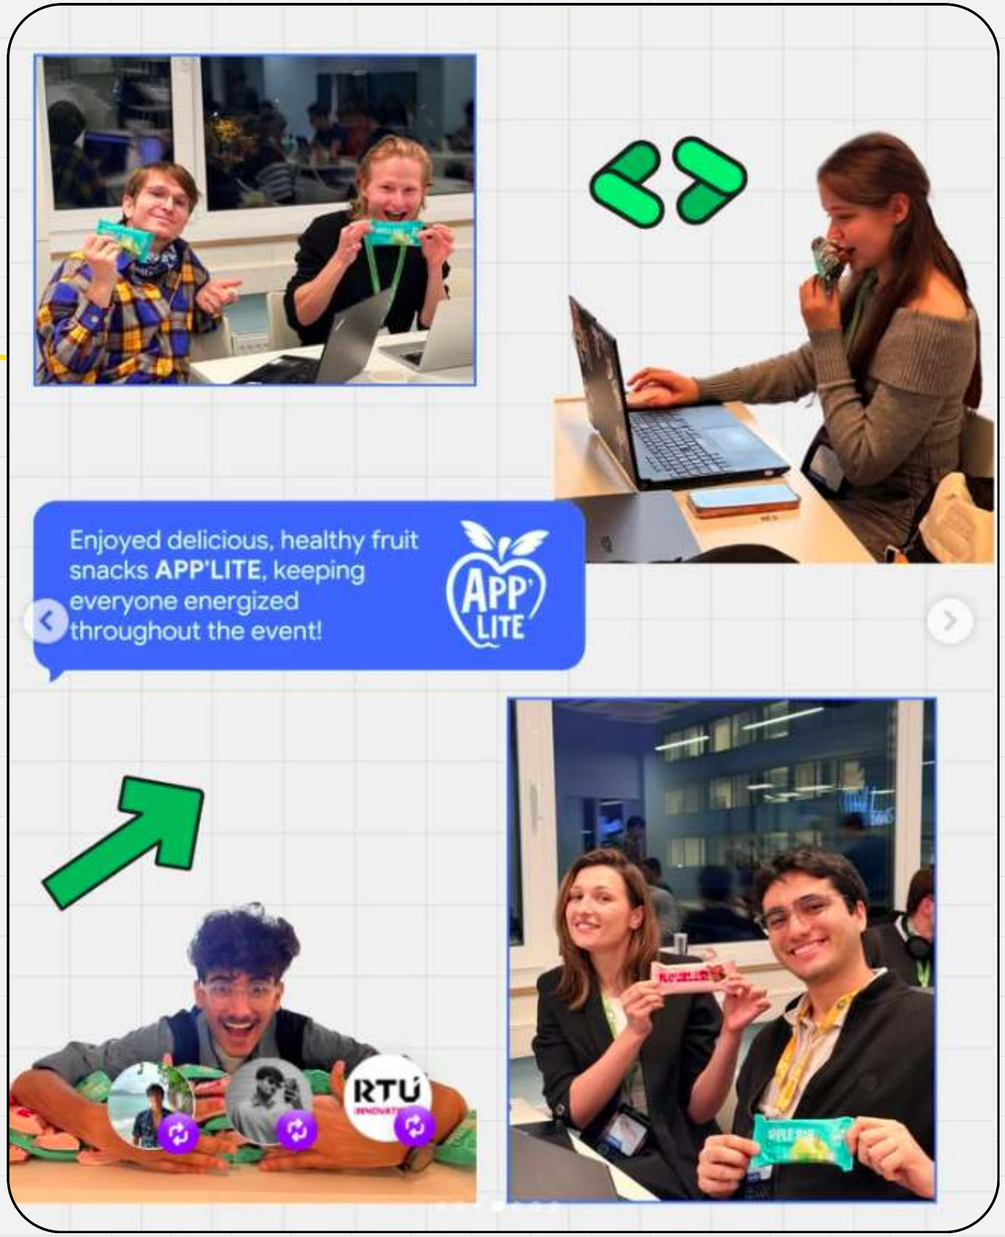

- **Venue Partner branding** on welcome and partner slides, plus a **spoken acknowledgment by the host**.
- **Visible on-site signage**, subject to the venue's branding and safety guidelines.
- A **short welcome speech** from your company representative.
- Optional **branded host corner, venue tour, or networking activation**.
- Opportunity to **showcase your services, career opportunities, or innovation initiatives** through a QR code or display.

After DevFest.

Your contribution stays visible after the doors close.

- **Venue Partner recognition** in post-event thank-you posts and event recaps.
- **Tagged event photos, Instagram Stories, and Reels** showcasing your venue.
- A **curated selection of professional event photos** featuring your space in action, with usage rights agreed in advance.
- A **joint LinkedIn article or interview** highlighting your company's contribution to community, innovation, or talent development.
- An opportunity to **host a follow-up community meetup or workshop** at your venue, subject to a separate agreement.

We are looking for in-kind venue support.

We are flexible about the configuration: a single conference venue or a coordinated combination of usable spaces may work. Final suitability depends on capacity, fire-safety rules, accessibility, event flow, and technical requirements.

YOU PROVIDE

A space for ~500 people
Main hall + breakout area(s)
Accessibility + seating
Wi-Fi, power & AV
Setup and breakdown access

WE CREATE

The program & speaker experience
Volunteer-led coordination
Participant communications
Promotion and media content
Meaningful partner recognition

Not another day of passive listening.

TECH TALKS

LIVE WORKSHOPS

HACKATHONS

NEW CONNECTIONS

100% volunteer-powered.

NOT GOOGLE EMPLOYEES

We are students and young professionals who contribute our time, skills, and energy because we believe that **opportunities to learn, build, and connect should be accessible to everyone**.

By partnering with us, your company does more than support an event. **You help make technology education and meaningful professional connections accessible to hundreds of people in Latvia.**

THE RIGHT TIME TO BE PART OF THE LATVIAN FUTURE.

If your space is built for ideas, people and collaboration, there is an opportunity to give it a new role for one remarkable day.

LET’S BUILD IT TOGETHER

Become the place where Riga’s tech community meets.
